

Family Care Program

Dr. Fortney feels a responsibility to your entire family to provide quality orthodontic care. She, in accordance with the American Board of Orthodontic guidelines, prefers to see children at age seven (7) when permanent teeth start to erupt. Early treatment can often minimize future orthodontic problems and maximize treatment results. Dr. Fortney also screens for obstructive breathing, no child should breathe through their mouth and/or snore. It is not necessary to have a referral from your general dentist.

Therefore, Hidden Valley Orthodontics has a Family Care Program. When you complete the form below, we will track the sibling's ages. At seven (7), we will invite them to be part of the HVO Kids Club and schedule their First Look appointment to evaluate tooth eruption, growth and skull development.

This club is for family members under age 7!

You will receive a birthday card until age 7 and an invitation to Patient Appreciation Day at The Wave Water Park.

This club is for family members not quite ready to start. But you are part of the HVO family!

- HVO Kids Club Gear
- No Cost Growth and Guidance appointment.
- Dr. Fortney will continue to evaluate tooth eruption, growth and skull development.
- 1 complimentary 3D X-ray
- Patient Appreciation Day at The Wave Water Park

As a family care provider, we welcome family members of all ages. Meaning parents, if you have an orthodontic concern we encourage you to take advantage of our Parent Pass Program at \$149 down, \$194 a month.

Dr. Fortney is the Invisalign expert in North County!
